

Purpose of Philosophical Writings.

Why do I express my thoughts in writing, on the web-page!

Let me clarify, these are not with a purpose of spreading any ideology.

Also, I am an ordinary man with family ("Gruhastha"). I am no expert, no scholar and no Guru. No one need be guided by my thoughts.

I do not invite any debate. Philosophy is not a subject of debate.

However, when I started real philosophical search for answers, I got some answers from several sources. Including inspiration. Including Indian philosophical Shastras & Puranas. I have also done several "experiments in religion". For example - Religion says - "Help others".

I have tried to help.

What are the consequences of following religion ?!

A part of my beliefs & experiences are shared here.

Because - There must be many people like me who have queries, issues & questions. They may be seeking answers. If my writings are of any help to anyone, I will be happy.
